

THIS PROJECT REIMAGINES GROUNDWATER IN AL-KHALIFA NOT AS A HIDDEN THREAT, BUT AS A VISIBLE CATALYST FOR REGENERATION. BY TRANSFORMING EXCESS WATER INTO A CONNECTED SYSTEM OF ROOFTOP PUBLIC SPACES, PRODUCTIVE URBAN FARMING, AND INTERGENERATIONAL CRAFT EXCHANGE, THE PROPOSAL TURNS INFRASTRUCTURE INTO EXPERIENCE AND SCARCITY INTO OPPORTUNITY. IT STITCHES TOGETHER SOCIAL LIFE, LOCAL ECONOMY, AND CULTURAL CONTINUITY THROUGH A PARTICIPATORY FRAMEWORK WHERE RESIDENTS ARE NOT USERS, BUT CO-CREATORS. IN DOING SO, THE PROJECT ELEVATES BOTH THE STREET AND ITS COMMUNITY LITERALLY AND SOCIALLY INTO A RESILIENT, SELF-SUSTAINING URBAN ECOSYSTEM.
